# OUR CORE SERVICES

Empowering Your Workforce with Comprehensive Safety Training and Consulting

## CSST – Construction Site Safety Technician

This course is designed to provide all trainees with a basic awareness of hazards they may encounter on the job site. Our CSST program equips construction workers with the knowledge and skills to maintain a safe and compliant workplace.

- Who It's For: Construction workers and job site supervisors.
- Key Benefits: Reduce workplace accidents, improve hazard awareness, and ensure compliance with safety standards.

## OSHA Outreach Training

Our OSHA Outreach Training program offers both basic and advanced safety training to prepare workers for common safety and health hazards on the job.

- Program Options:
  - OSHA 10-Hour Training
  - OSHA 30-Hour Training
- Who It's For: Workers in construction, manufacturing, and other industries.
- Key Benefits: Ensure OSHA compliance, reduce workplace risks, and foster a culture of safety.

## Equipment Training

Our equipment training programs are designed to help employees earn their certifications as operators while ensuring they are confident in using machinery safely and effectively.

- Who It's For: Equipment operators and businesses requiring certified operators.
- Key Benefits: Improve operator efficiency, reduce equipment-related accidents, and meet certification requirements.

## Equipment Training

Our equipment training programs are designed to help employees earn their certifications as operators while ensuring they are confident in using machinery safely and effectively.

- Who It's For: Equipment operators and businesses requiring certified operators.
- Key Benefits: Improve operator efficiency, reduce equipment-related accidents, and meet certification requirements.

## Safety Consulting Services

Our safety consulting services are tailored to meet the unique needs of your organization. From workplace evaluations to hazardous materials management, we provide solutions to ensure compliance and reduce risks.

- Services Include:
  - Emergency response planning
  - Hazardous materials management (from acquisition to disposal)
  - Workplace safety evaluations
- Who It's For: Businesses looking to enhance workplace safety and compliance.
- Key Benefits: Custom solutions, improved safety culture, and reduced liability.
